

Monopak Stereo to Mono Combiner

Monopak Stereo to Mono Combiner

The Alice Monopak produces a fully buffered balanced-line mono output from a balanced-line stereo input. Output gain is adjustable via an accessible multi-turn preset from 10dB loss to 20dB gain with reference to 0dB input on both left and right inputs. Bridging-balanced audio inputs and mono-balanced output are via Neutrik XLR type connectors and can be wired unbalanced if required. Mains input is via an IEC connector with supplied lead. Rack mountable with the RPK-1 adaptor.

Technical Specification

Input impedance:	>20k ohms balanced
Frequency response:	20Hz to 20kHz +0dB – 0.1dB
Common-mode rejection:	>60dB
Noise at unity gain:	-100dB ref. +8dBu
Distortion:	<0.005% 1kHz +8dBu output
Max. input level:	+25dBu
Max. output level:	+25dBu
Output impedance:	<1 ohm balanced and floating
Mains supply:	230 V AC 3VA (115V available to order)
Dimensions:	254 (W) x 113 (D) x 44 (H)
	0dBu = 0.775 volts RMS
